## **Trump. Afrikaners and Trump's War on the ANC**

How does Pres. Trump even know about Afrikaners? My background in introducing Afrikaner Boere to MAGA America. The implications of Trump's war on the ANC.

In 1998 my wife and I went to America to open a branch office of our business to promote exports from South Africa to America. I had extensive experience in America being raised there as a youngster when my mother was working at the SA embassy in Washington DC and my father had his own business. Later finishing matric I went back for college in California.

We discovered that the best export we could do out of South Africa to America was specialized farm workers. Not the type of field work the Mexican farm workers were doing. We discovered that America had a special temporary work visas for farms that offered seasonal not fulltime employment. It was called an H2-A visa. My wife Annora started studying how we could assist farmers there to obtain these special work visas. Very complicated procedure usual handled by immigration attorneys. But she figured it out

I zeroed in on the Custom Harvesters of America Association and started calling their members. I could offer them young men who knew John Deere mechanized farm equipment, who can speak English, were Christian and had spent their lives growing up on family farms. These companies had large caravans of tractors, tucks, combine harvesters and tended to start in the northern states going from farm to farm doing contract harvesting and then moving south as the season progressed. They needed skilled workers for about 8 months of contract work for a season. It was difficult to find Americans to do this as seasonal work. So they could apply for foreigners.

So how did the American president learn about "Afrikaners"

At that point nobody in the American farm world of mid-America knew anything about what an "Afrikaner Boer" was or even that there were a large white farming community in South Africa. All I heard initially was "We don't want nobody from Africa". You understand the meaning of that without me having to explain.

That first placement season of 1999 we managed to place 126 chaps from the SA farm community in legal H2-A employment with farmers and harvesters in America. The next year in 2000 it was 520. And after that it just exploded across the farm belt of America and across the platteland of the SA farm community ads for "Work in America on farms" went viral on Landbou Weekblad and other farm publications.

What happened was the American farm community met "Afrikaner Boere" for the first time and they loved our people. Wanted them back the next year, and their farm

neighbours wanted them. This has gone on for the last 24 years. Last year in 2024 12,600 SA farm workers went on farm contract to America. There is not a farming family in SA that has not either sent a son or daughter to America or one of their neighbours has. Through the years we have had many stories of some family farms here in SA being saved through extra income from work on farms in America.

In America the bedrock of president Trump's MAGA Republican party are the mid-western farm states of America. And across all those states they now know who the "Afrikaner Boere" are. They know the South African story. Which is why Donald Trump knows who the Afrikaners are and it was not by knowing Elon Musk.

I tell all that to give you the context of the very important implications of what Trump said regarding "Afrikaners", South Africa and sanctions. There are a lot of misconceptions floating around the media. There is all sorts of blame being loaded on to Afriforum and Solidariteit.

So let me lay out the facts as they really are behind the scenes:

The Trump administration is at war with the ANC government and not South Africa and the motivation is not to rescue Afrikaners. That is a separate matter that has to do with their MAGA plans.

The American government is in a geostrategic battle with a new multi-polar world order. Their chief world peer adversary is China and peripherally all nations aligned with China in the BRICS community.

If you see international peace talks between America and Russia it is because America wants Russia out of Chinese dependency. They want China isolated and they want access to Russia's minerals and specially rare earth minerals. Trump will ditch Zelensky and Ukraine for this.

America's greatest power is not military but the dollar. And dollar hegemony is being challenged by China's Yuan. And anyone deeply beholden to China and willing to ditch the dollar in their trade in Yuan will be a designated threat.

South Africa is the low hanging easy picking fruit on the BRICS tree. Highly vulnerable. South Africa will be an object lesson for other BRICS nations.

South Africa's most important failure with respect to our government's relationship with America is disregarding the very important and powerful Jewish lobby in not just American politics but American finance and the American evangelical church.

They are all furious with the SA government over the Gaza/genocide prosecution of Israel in the ICJ. Nobody else in the world would take that case on. Rumour has it the Iranians or whoever paid the ANC to do it. I don't know if true or false. It does not matter. The ANC has made some very powerful enemies in the world and retribution is now coming.

The second major mistake Along with the ANC's attack on Israel is its friendship with America's enemies: Iran, Cuba etc. Iran is a special case. The ANC inherited South

Africa's National Party government's secret services and their secrets including how to make atomic bombs. Israel and America are at war with both Iran and the ANC for the same reasons.

The third major mistake of the ANC is to be doubling down on pure race based discrimination laws particularly aimed at minorities in the country and designed to favour the majority. I have seen it said by researches at least 120 and some say 140 specific new race based laws since the new supposedly non-rational government of 1994 have been passed by the ANC.

The new BEE legislation greatly enhanced the discrimination in the race laws. Previously you just needed a certain BEE quota to get government work.. Now regardless of government contracts all businesses over a certain amount of employees are set racial quotas.

The new American administration is taking out "DEI" (diversity, equity, inclusion) out of the entire American society, businesses, university, schools, military, government. It is illegal and will be prosecuted by their department of Justice.

The ANC government is the world's most prominent race based quota nation in the world taking over from the previous Afrikaner Nationalist party soon to get the same treatment as PW Botha's government after the infamous 1985 Rubicon speech.

The uproar in the media and parliament by all parties of "We will not be bullied" is useless grandstanding as PW Both found out. Yes we will be bullied by the international bond markets, the international business community. And I don't see any of the BRICS nations rushing to our defense.

Which brings up the issue of "refugees to America".

There is a lot of nonsense from the media commentators about how difficult life as a refugee is or to be classified as such. And then further nonsense about "So who is an Afrikaner" hoping to discourage as many as possible from even considering an American exit.

America is qualifying their offer to anyone who as a minority has been denied their rights to work and prejudiced. That includes any whites, coloureds, Indians or others.

Further clarification. What kind of people out of South Africa does America want? What do they need? I will give you an example. Back when we were working our operation in America they had a 50,000 yearly limit on H1-B workers...that would be people in industry or technology. Last year they issued 980,000. Why? Because they needed hundreds of thousands of tech workers from India.

America will take any workers out of South Africa that they need and give them the work and resident permits they need. What do they need from South Africa? Let me give you a clue from one of the priorities of Robert Kennedy Jr. the new secretary of Health and Human Services. I quote from recent reports....

***More interesting, Kennedy and the MAHA movement (Make America Healthy Again) will push to revitalize small farms.***

- ***Family Farms Disappearing: Over 141,000 farms lost between 2017 and 2022, with just 1.89 million left in the U.S. today.***

***Days before the presidential election in late October, Kennedy published a video in which he stated, "If Trump gets me inside" the United States Department of Agriculture, "we're going to give farmers an off-ramp from the current system that destroys soil, makes people sick, and harms family farms."***

***In other words, RFK Jr. and the MAHA team will ensure that small farms are made great again by directing policies to focus on traditional agriculture.. The MAHA movement ensures that small farms will be prioritized over mega-corporate farms.***

America is looking for experienced farmers to rebuild their base of small family farms. Every one of the thousands of Afrikaner farmers who have worked in America on the H2-A system has excellent contacts with American farm communities who will take them on tomorrow if they can get them as permanent residents and full time employees. And most of those will not stay long as farm managers. They will access generous US government finance for the family farm initiative and buy their own farms.

What else would America want as to South African workers? The Trump program plan is to build America's industrial base. They are telling Europe and other nations, if you want to sell your products to America, build factories here. America needs industrial workers and miners.

In fact you could take the entire membership of the Solidariteit Union who are mostly industrial and mining union members and are all mostly Afrikaners and America would take the lot of them because of their skills and their documented cases of racial discrimination.

And what about the new NHI medical system on the way. How many medical personal are going to actively look for jobs overseas rather than being assigned by government where they will work and for how much. America will take all of them.

Folks there is serious trouble ahead. The world as it is will be going into a recession. Nobody in either America, the EU, Asia, China cares if the ANC de-industrializes SA. All they want are our minerals and they will take them raw out of the ground and all the profits will go overseas.

The days of SA exporting R30 billion in automobile exports to America are coming to an end. The EU is facing the same. SA clings to the fiction of "the energy transition: from fossil fuels and carbon to renewables. This is fiction there is no world energy transition. There is only more coal, gas, oil burning in America, India China Japan and the rest of the world. Nobody is going to finance SA off of coal. And we dont have the money to build new baseload coal power stations.

And what is even worse there is a large racist element in the ANC, EFF, MK who don't care if the nation loses its white farmers and industrial workers.

America has placed the ANC in their crosshairs. It is economic warfare. America knows there will be economic casualties and they will offer jobs and permits under whatever visa designation they choose to take the skill sets they want out of South Africa for their MAGA program.

I will end this week's blog there. The bad news. And the geopolitical context for the current headlines.

I do however need to give a spiritual context to what I believe the prophetic purposes of God are for this nation and the Church. And where we are on God's Kingdom agenda worldwide.

We will continue next week.....
